

Barcode configuration is that barcode scanner can scan the barcode to be configured without other auxiliary equipment, and change scanner's configuration parameters fast, so that the scanner gun into the working state quickly.

Every type of scanner produced by Generalscan can use this manual conveniently to configure serial port parameters, output parameter, the code enablement etc. Barcode configurations in the manual include the various parameters in the normal use of the scanner, to facilitate the customers to print and use.

Get the manual through the following channels:

1 Click the "Barcode Configuration" in the software iScan(The Generalscan company specializing parameter configuration software) to start your work. Please see the help when you have any problem.

Click the "barcode configuration manual" button to obtain the manual. Choose "print" to get the paper barcode configuration manual; or just scan the barcode on the screen to change your parameters.

2 Download or print the manual from www.generalscan.com.

Table of Contents

How to use this manual.....	1
Scanning Parameters Configuration	2
Start Settings	2 (A1)
Stop Settings	2 (A2)
Send no Save	2 (A3)
Send and Save.....	2 (A4)
Enabled Scanner	2 (A5)
Disabled Scanner	2 (A6)
Receive all settings	2 (A7)
Default all scanner settings	2 (A8)
Host port connection	2
Baud Rate 1200bps.....	2 (B1)
Baud Rate 2400bps	2 (B2)
Baud Rate 4800bps	2 (B3)
Baud Rate 9600bps	2 (B4)
Baud Rate 19200bps	2 (B5)
Baud Rate 38400bps	2 (B6)
Baud Rate 57600bps	2 (B7)
Baud Rate 115200bps	2 (B8)
None Parity	3 (B9)
Odd Parity	3 (B10)
Even Parity	3 (B11)
One Stop bit	3 (B12)
Two Stop bits	3 (B13)
Seven Data bits	3 (B14)
Eight Data bits	3 (B15)
Trigger Mode	3
Continuous read	3 (C1)
Continuous Read 1 output	3 (C2)

External Level	3 (C3)
External Edge	3 (C4)
Serial Data	3 (C5)
Output	3
Enabled Postamble	3 (D1)
Disabled Postamble	3 (D2)
Enabled Noread	3 (E1)
Disabled Noread	3 (E2)
Scanning Speed.....	4
Scanning Speed 50 times per second	4 (F1)
Scanning Speed 100 times per second	4 (F2)
Scanning Speed 150 times per second	4 (F3)
Symbologies.....	4
Enabled Code39	4 (G1)
Disabled Code39	4 (G2)
Enabled Codebar.....	4 (G3)
Disabled Codebar	4 (G4)
Enabled i25	4 (G5)
Disabled i25.....	4 (G6)
Enabled UPC/EAN	4 (G7)
Disabled UPC/EAN.....	4 (G8)
Function Enable	4
Enabled TTR Test.....	4 (H1)
Disabled TTR Test.....	4 (H2)
Enabled Buzzer.....	4 (H3)
Disabled Buzzer.....	4 (H4)
Enabled LED	4 (H5)
Disabled LED	5 (H6)
Single Barcode.....	5 (H7)
Multiple Barcode	5 (H8)
A key Set.....	6
Bluetooth Output	6 (J1)

Serial Output.....	6 (J2)
USB Output	6 (J3)
Get ID number	6 (J4)
Bluetooth Pair Mode.....	6 (J5)
Enabled Offline Storage	6 (K1)
Upload Data with fast-speed.....	6 (K2)
Upload Data with Medium-speed	6 (K3)
Upload Data with slow-speed.....	6 (K4)
Number Statistics.....	6 (K5)
Remove Data	6 (K6)
Disabled Offline Storage	6 (K7)

1 How to use the Barcode Configuration Card :

Steps to use Barcode Configuration Card :

(1) Scan the "Start Settings ";

(2) Scan that you need to modify the parameters of the corresponding bar code;

(3) Scan "Send and Save" or "Send no Save "barcode, choose to save or not save your changes;

(4) Scan "Stop Setting" to end the bar code configuration.

2 An Example:

Follow these steps if you need to modify the trigger model:

Firstly, scan the bar code

Start Settings

Secondly, scan what you want to modify the trigger, for example, scan the "trigger level "bar code to level-triggered:

Trigger Level

Again, scan the "Send and Save "or "Send no Save" to save or not save your settings:

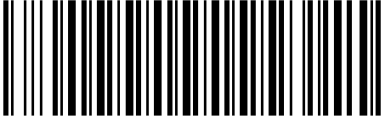

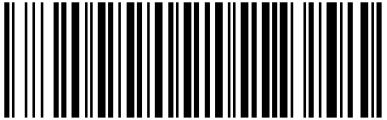

Send and Save

Finally, scan "Stop Setting "to complete the trigger changes:

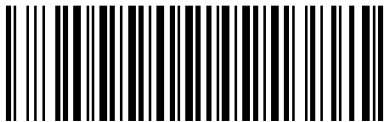

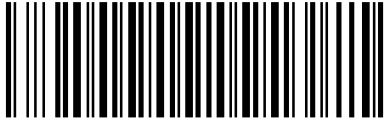

Stop Settings

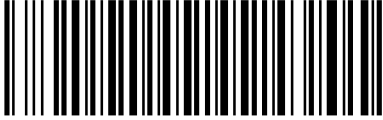

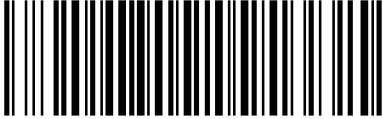

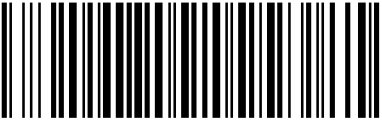

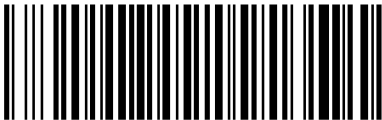

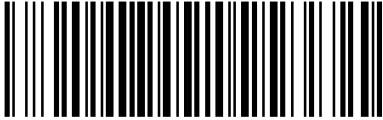

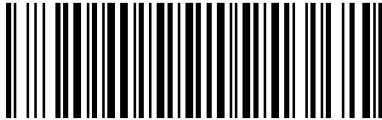

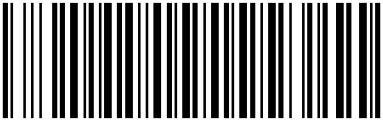

Barcode Configuration Card

 Start Settings A1	 Stop Settings A2
 Send no Save A3	 Send and Save A4
 Enabled Scanner A5	 Disabled Scanner A6
 Receive all settings A7	 Default all scanner settings A8
